## Profile Summary

Associate Consultant with 3 years of professional experience in corporate IT, specializing in delivery support for the USA market. Demonstrated expertise in deploying builds and troubleshooting interconnected devices within the restaurant industry. Proficient in a range of Java technologies including Core Java, Spring Boot, Microservices, Maven, and REST APIs. Currently learning DevOps tools such as Jenkins, Docker, Kubernetes, and AWS. Passionate about enhancing operational efficiency through automation and scalable Java-based solutions.

## Professional Experience

### Associate Consultant

- Capgemini Technology Services India Limited, Hyderabad, India
- Jan 2022 - Present

### Responsibilities:

- Spearheaded the successful deployment of builds across USA-based McDonald's stores, ensuring seamless implementation with minimal downtime under tight deadlines.
- Collaborated with cross-functional teams, including developers, testers, and project managers, to align objectives and deliver consistent results.
- Played a critical role in resolving technical challenges during high-pressure deployments, contributing to the success of high-volume rollouts.
- Developed automation scripts to streamline deployment workflows and reduce manual efforts.
- Incident response through ServiceNow and Jira.
- Having open lines of communication with clients and finding a solution.
- Conducted device triaging and troubleshooting for interconnected systems across stores, ensuring operational continuity and minimizing service disruptions.
- Contributed to process optimization by identifying inefficiencies and recommending improvements to enhance system performance and deployment speed.

## Education

**Biju Patnaik University of Technology, Odisha**

Bachelor of Technology in ECE
2017 – 2021
CGPA : 7.8/10
